The existing bridge is a single-span non-composite prestressed concrete adjacent box beam bridge and will be replaced with a wider precast concrete arch bridge on the same alignment. The project will also include associated roadway work on the bridge approaches. A combination of federal, state, and local funding will be used for this project.

Construction is anticipated to begin in late 2025 or early 2026 and will require a roadway closure. The 1.4-mile detour utilizes Prayer Mission Road, East Prospect Road (SR 124), and Manor Road. Access to driveways is anticipated to be maintained during construction. The detour is shown below and on the plans on display at the Township building.
