

West Street Paving Notice

Good afternoon:

- The contractor for the water project scheduled paving work to begin tomorrow, June 3, on West Street to place asphalt in the trench, in place of the temporary gravel repair.
- The work will consist of removing some of the stone to match the existing asphalt thickness, and placing hot mix asphalt, and rolling the surface for compaction.
- During this work one lane of travel will be disrupted which will cause traffic impact. However, traffic flow will be maintained and the road will not be closed.
- Questions please call Town Manager Stuart Turille: 540-967-1400.
