

BOROUGH OF TARENTUM

Borough of Tarentum Announcement: Electric Pole Replacement Project

Project Duration: July 23 through mid-August

The Borough of Tarentum is pleased to announce an upcoming electric pole replacement project aimed at improving the health and reliability of our electric infrastructure. Over the course of this project, we will be replacing ten electric poles in various locations within the borough.

Important Details:

- **Project Dates:** July 23 to mid-August
- **Scope:** Replacement of 10 electric poles

Impact on Residents and Businesses:

- **Road Closures:** Expect road closures in specific areas during the project.
- **Lane Restrictions:** Some areas will experience lane restrictions to accommodate the work.
- **Periodic Power Outages:** There will be periodic power outages limited to the immediate vicinity of the poles being replaced.

Project Phases:

Each pole replacement will be done in several phases to ensure safety and efficiency. The phases are as follows:

1. **Site Preparation:** The area around the existing pole will be prepped, which includes clearing any obstructions and setting up necessary safety measures.
2. **Pole Replacement:** The old pole will be removed, and the new pole will be installed.
3. **Power Reconnection:** Power lines will be reconnected to the new pole, which may result in temporary power outages for surrounding areas.
4. **Cleanup:** The site will be cleaned up, and any temporary measures will be removed.

The Borough must complete these phases for each of the ten poles, which is why the project spans approximately 30 days, depending on weather conditions and equipment availability.

Tentative Schedule:

- **Ross Street Pole Replacements:** 1 pole at approximately 214 Ross
 - **July 31:** Lane restrictions on Ross Street; Parking lot on 4th Avenue will be closed.
 - **July 30:** Lane restrictions on 2nd Avenue and Ross Street.
