

CHESWICK BOROUGH RESIDENTS FROM MAYOR DAN CARROLL AND COUNCIL

Cheswick Borough Officials want to alert residents, businesses, and commuters about the scheduled completion of the Cheswick Power Station's boiler house demolition.

The demolition will occur on Saturday, March 8, 2025. At this time, the demolition is expected to take place between 9:00 am and 11:00 am. CPERG (Cheswick Power Station Property Owner), and B&B Demolition Company (Demolition Contractor) are managing the operation.

There will be no explosives used for the demolition; they will be using a cable pull technique to collapse the building.

The operation will necessitate extensive road closures and detours in and around the impacted area. Signs will be posted at the closures indicating alternate routes and uniformed police officers will be on hand to assist and direct the public accordingly.

Due to a heightened concern for safety, a safety perimeter will be established around the location. Please listen to the police and workers during the operation. No one will be allowed on any closed streets or public easements. This is being strictly enforced for everyone's health and safety.

Individuals residing within the exclusion zone are not obligated to evacuate during the operation; however, we strongly advise and recommend that all residents in the exclusion zone remain sheltered in their homes during and for 30 minutes following the building's collapse.

Every street closed for this event will reopen as soon as the contractor gives the all-clear and all areas have been inspected.

The shelter-in-place area will encompass South Duquesne Avenue within the inclusion zone.
