

NOTICE

Paving work for the water project is planned to be performed starting Monday, June 29, 2026. The areas impacted will be West Street, Ellisville Drive, and Cammack Street. Work will include completion of trench repair followed by milling and overlay of the road surfaces. This work will cause delays due to the need for lane closures leading to single lane traffic. At this time, the work is planned to be completed next week. Updates will be provided for changes in the schedule due to unforeseen circumstances.
