FOR IMMEDIATE RELEASE

Waterline Improvements Scheduled Near 420 West Main Street

The Town's Public Works Department will be performing waterline infrastructure improvements in the area of **420 West Main Street**.

Public Works has experienced numerous water main breaks in this section of the distribution system. In response, crews will be installing a new main line gate valve to improve system control and sectional isolation. This upgrade will allow staff to better isolate the affected area during future repairs and restore water service more efficiently to residents and businesses in the vicinity.

During the course of this work, the public may experience:

- Temporary water service interruptions for properties within the immediate work zone, including portions of Epworth Manor, parts of South Street, and Cammack Street
- Reduced water pressure during active construction
- Lane restrictions and traffic control in the area
- Normal construction-related noise during working hours

This improvement is intended to enhance operational reliability and reduce the impact of future system failures.

Public Works is diligently working to address these ongoing issues and complete the installation as efficiently as possible. We appreciate the community's patience and understanding while this necessary infrastructure work is performed.

Should you have any questions, please contact Stuart Turille, Town Manager, at (540) 967-1400.
