

With temperatures rising this week, it's already starting to feel like summer is here. PECO has been hard at work ensuring critical infrastructure is prepared to handle increased demand as temperatures heat up with the changing season. This includes work to prepare infrastructure and test processes and procedures to ensure safe and reliable service all summer long and strengthening the local energy grid against the increasing impacts of severe summer storms.

Just as PECO prepares for summer, you should prepare, too. Use the tips below to manage your account so you can kick back and enjoy the summer.

- **Be Ready for Potential Outages:** We encourage you to [prepare now](#) in case you are impacted by any weather events this summer.
 - Download the [PECO mobile app](#) for outage reporting and updates.
 - Bookmark PECO's outage [webpage](#) to report online and sign up for updates.
 - Enroll in our two-way texting program by texting "ADDOUTAGE" to MYPECO (697326). Once enrolled, if you experience an outage simply text "OUT" to 697326 to report your outage.
 - Visit [peco.com/storm](#) for important storm readiness resources, including [how to prepare](#) for an approaching storm, [what to expect after storms](#), and how to stay safe.
- **Automate your Bills:** [Enroll in eBill](#) for access to your bill 24/7, no more waiting for the mail. Then take the worry out of making payments with [AutoPay](#) to have payments automatically deducted on your due date.
- **Monitor Usage:** Through [MyAccount](#) you can track your energy use and set up high usage alerts, get tips on how to reduce costs, and more.
- **Increase Energy Efficiency:** Visit [Ways to Save](#) to learn about energy assessments and how to qualify for rebates and incentives.

As you look forward to enjoying the new season, please take advantage of these programs to help minimize impacts on your bill from warmer temperatures and higher usage.
