

“Waste Pro intends on servicing the Town of Inglis tomorrow, Friday, October 9, 2026 for regularly scheduled recycling and yard debris pick-up. We are carefully watching the track of Hurricane Isaias. If there are roads that are flooded, we will not be able to service those roads. If the wind speed is consistently 35 mph or over, we will not be able to service the Town due to FDOT rules. We will stay in close communication with Town Hall with any changes to service, as they arise. If we are not able to provide recycling and yard debris pick-up tomorrow, next Friday is the next regular scheduled day. Thank you for your understanding.”

Sincerely,

*Dayna Williams, Director of Government Affairs,
North Florida Region, Waste Pro of Florida, Inc.*
