RE: Existing Hermes Well Pad

To Whom it May Concern,

Verdanterra, LLC is a multidisciplinary consulting firm providing professional surveying and mapping services to a variety of clients. Our team will soon be conducting surveys on behalf of EQT Corporation in support of natural gas permitting within your township. These surveys are related to proposed well lateral locations for the existing Hermes Well Pad, which is located in the Municipality of Murrysville.

While surveying for well lateral locations, we may require access to properties in the township.

The purpose of identifying property boundaries is to assist EQT in planning well lateral locations in accordance with existing lease agreements. If a property is not leased with EQT, this survey helps EQT plan well lateral locations to avoid impacting un-leased parcels.

Please note:

- **No brush cutting or land disturbance will occur.**
- **Our activities are limited to observation and measurement only.** We will use Global Positioning System (GPS) equipment to locate property corners, fence lines, and other boundary evidence.
- **Access will be by foot only—no ATVs, trucks, or other motorized equipment will enter your property.**

For questions regarding our survey activities, contact our survey department at:

notifications@verdanterra.com

For inquiries about mineral leases, land acquisition, or oil and gas operations, please contact EQT Owner Relations at **(844) 378-5263**.

Thank you for your cooperation.

Sincerely,

Verdanterra, LLC
