Dear Planning and Zoning,

My name is Roger Donaldson. I own an upland island parcel #0226900100 in Yankeetown.

I would like to employ my parcel as an oyster farm. My parcel is located inside the conditionally approved zone for aquaculture which includes oyster farming.

I have started the initial application process with the Florida Department of Agriculture and Consumer Services (FDACS) to propose my farm structure which will consist only of four buoys defining my farm situated in the tidal zone around the outer perimeter of the parcel. The farm equipment will consist only of buoys, lines, and 50 lantern baskets for minimal impact.

FDACS told me that in order to nominate my parcel, it will first need to be approved by you.

Aquaculture is a thriving trend of the future. It is highly regulated, and I am excited to possibly create the first aquaculture oyster farm in Yankeetown.

I am grateful for your consideration!

Kind Regards,
Roger Donaldson
