

Marysville Borough

Snow and Ice Removal Information

[SNOW EMERGENCY DECLARATIONS](#)

Snow Emergencies will be declared by the mayor when needed. The declaration will be placed on the borough Facebook page, website, and television. Residents shall remove their vehicles from the snow emergency routes, or they will be towed at the owner's expense.

Snow Emergency Declarations are reported to the local media and can be found via the following media outlets: WGAL 8 CBS 21 WHTM 27 FOX 43

[SNOW EMERGENCY ROUTES](#)

The following are snow emergency routes:

Street	Between
Antler Drive, both sides	Entire length
Borough Square	Entire area
Cameron Street	Adams Avenue and Route 11/15
Deer Trail, both sides	Entire length
Doe Run, both sides	Entire length
Greenbriar Drive, west side	Route 850 and Front Street
Ridgeview Drive, south side	Route 11/15 and the property line between 206 and 208 Ridgeview Drive
Ridgeview Drive, both sides	From 230 and 231 Ridgeview Drive to Antler Drive
Verbeke Street, both sides	Front Street and Cassell Street
Whitetail Terrace, both sides	Entire length
Williams Street, south side	Entire length

After a snow emergency is declared, it is prohibited to park a vehicle on these routes. Vehicles incapable of moving, parked or stalled will be towed at the owner's expense.

[SNOW REMOVAL POLICY](#)

The following is the general snow removal policy for the Borough, with suggestions for the residents to make the job more effective and efficient. This plan is general policy, and each storm will dictate how it is implemented and what adjustments will be made. For winter storms the Borough is divided into sections with a vehicle assigned to each section. The first priority is to make the streets safe for the traveling public; priority of each vehicle is to open

each street in its assigned section. At the start of the storm, all trucks are sent out to their assigned areas with the instructions to salt hills, intersections and curve areas first, then all other areas. Salt needs the movement of traffic to make it effective, so if it appears that your street has not yet been done, it may be that there has not yet been enough traffic on the street. For plowing, the drivers are instructed to make one pass in each direction on the street, and they are to make one pass in and one pass out in the cul-de-sacs. After each one is passable, we will start to the procedure of pushing back the snow to the curb and cleaning out the cul-de-sacs. This operation may not begin until the following day because the employees will be sent home to get some rest after the long grueling hours spent in the initial plowing effort. You can help by following the suggestions below.

VEHICLE PARKING

If possible, park off the street in your driveway, or to the rear of your property. In case of multiple vehicles, park as many in your driveway as possible because the more driveway surface that is protected, the less shoveling will have to be done. In cul-de-sacs, which are difficult enough to plow without vehicles parked in them, park all vehicles off the roadway. It doesn't help at all to park at the end of the cul-de-sac along the curb or to double park vehicles in that area. Many cul-de-sacs have storm drains at the end of them and that is the area we try to plow the snow to.

SNOW AND ICE REMOVAL by RESIDENTS

The owner, occupant or tenant of every property fronting upon or alongside any street must remove all snow and ice from the sidewalk within 24 hours after the same ceases. No snow or ice shall be put upon Borough streets.

The owner, occupant or tenant of any property on which a fire hydrant is located shall remove or cause to be removed, all snow and ice which limits access to, from and/or around the fire hydrant to provide clear access to the fire hydrant by fire-fighting personnel.

SNOW AND ICE REMOVAL by THE BOROUGH

Marysville Borough practices an intense snow plowing program. The program is designed to clear snow and ice from the streets to make them passable for vehicles, especially emergency vehicles. Cleared snow is plowed as close as possible to the curb. At times this inconveniences the property owner; however, it does provide the maximum opportunity for emergency vehicles (police, fire, and ambulance) to have clear passage on the streets. Due to the varied widths of the Borough's streets, it may take several passes in each direction to do an adequate job. Please have patience with our Public Works Department during snow plowing conditions.

SHOVELING TIPS

Shovel snow early and often to prevent accumulation. Avoid shoveling the last 4 feet of your driveway until after the plows pass. This will save you time and effort!

We appreciate your cooperation in helping keep Marysville Borough safe during winter storms.
