ATTENTION REQUESTED:

UPCOMING SERVICE MAINTENANCE

Spectrum is conducting a physical survey of our existing cable infrastructure in your area. Spectrum's cable infrastructure is both underground and aerial and has been placed either in utility easements or the public (City/County/State) rights of way. Utility easements and rights of way exist along the front, side, and rear of property lines.

Authorized contractors will be performing this work on behalf of Spectrum by measuring, inspecting, and mapping the existing infrastructure along these easement and rights of way lines.

Contractors will be requesting access to these locations on your property to complete the survey. These authorized contractors will have signs affixed to their vehicles and identification badges on their persons stating they are authorized contractors for Spectrum.

If you have any questions or concerns, please contact Spectrum at **1-855-75-SPECTRUM**.
