

# NOTICE

## RABIES VACCINE DISTRIBUTION

Wildlife Services (**WS**) is working to protect people and pets from the threat of rabies in your area. **WS staff** are distributing an oral rabies vaccination bait to vaccinate raccoons, foxes and coyotes, and help stop further spread of rabies. An image of the baits is provided below.

### What if my pet eats the bait?

- **Don't panic!** A few baits are not harmful, though eating a large number may cause an upset stomach.
- Do not risk getting bitten or being exposed to the vaccine by taking a bait away from your pet.
- If your pet eats a bait, avoid your pet's saliva for 24 hours, and wash skin or wounds that may have been licked.
- **Do not handle baits with bare hands**

**Aug. 15– Sept. 20<sup>th</sup>, 2025**  
**Western Pennsylvania**
